

D:/source/repos/EventInput
Project/class/input/PadInput.h

```
graph BT; A[D:/source/repos/EventInput/Project/class/input/InputEvent.cpp] --> C[D:/source/repos/EventInput/Project/class/input/PadInput.h]; B[D:/source/repos/EventInput/Project/class/input/PadInput.cpp] --> C;
```

The diagram illustrates a file dependency structure. At the top is a grey box representing a header file: D:/source/repos/EventInput/Project/class/input/PadInput.h. Below it are two white boxes representing source files. The left box is D:/source/repos/EventInput/Project/class/input/InputEvent.cpp, and the right box is D:/source/repos/EventInput/Project/class/input/PadInput.cpp. Two blue arrows point from the bottom of each source file box up to the header file box, indicating that both source files include the header file.
